

## **Quality and Safety in Practice Committee**

### **Disclaimer and Waiver of Liability**

Whilst every effort has been made by the Quality and Safety in Practice Committee to ensure the accuracy of the information and material contained in this document, errors or omissions may occur in the content. This guide represents the view of the ICGP which was arrived at after careful consideration of the evidence available at time of publication. This quality of care may be dependent on the appropriate allocation of resources to practices involved in its delivery. Resource allocation by the state is variable depending on geographical location and individual practice circumstances. There are constraints in following the guide where the resources are not available to action certain aspects of the guide. Therefore, individual healthcare professionals will have to decide what is achievable within their resources particularly for vulnerable patient groups. The guide does not however override the individual responsibility of healthcare professionals to make decisions appropriate to the circumstances of individual patients in consultation with the patient and/or guardian or carer. The Quick Reference Guides are not policy documents. Feedback from local faculty and individual members on ease of implementation of these guides is welcomed.
